

PRODUCT INFORMATION DATA SHEET

LIBWAX - OPC

DESCRIPTION : Synthetic Wax

SPECIFICATIONS :

Appearance	:	Creamish Flakes
Melting Point	:	84-87°C
Penetration Hardness at 25°C	:	2.0-3.0 dmm
Flash Point	:	>300°C

PROPERTIES :

- Better wetting characteristics.
- Excellent disperse-ability in all polymer matrix.
- Reduces the viscosity of polymer matrix hence increased the through put rate.
- Improves the surface gloss with very low yellowness index.
- Reduces the COF (Coefficient of friction) during processing.
- Improve mold release cycle in moldings of Plastics / Rubbers.

APPLICATIONS :

- PE / PP Masterbatches
- PET Masterbatches
- Filled Compounds / Antifab Compounds

DOSAGE : 3.0 - 5.0%
